John Gabrielle Enabore

Barangay San Ignacio, San Pablo City, 4000 | john.enabore05@gmail.com | 09567548047

EDUCATION

Laguna State Polytechnic University, San Pablo City Campus San Pablo City, Laguna
Bachelor of Science in Computer Science *Expected June 2027*

Thesis: Smart Egg Sorter: A Three-Step Comparative CNN Transfer Learning System for Automated Multi-Species Fertility Detection

Relevant Coursework: Data Structures and Algorithms, Object-Oriented Programming, Information Management, Software Engineering 1 & 2, Intelligent Systems, Networks and Communications, Human-Computer Interaction

Plaridel Integrated National High School Nagcarlan, Laguna
Humanities and Social Sciences (HUMSS) — 93 average, Work Immersion Awardee *S.Y. 2022–2023*

EXPERIENCE

Full-Stack Web Developer, Freelance (Referral) July – August 2025
Lucban, Quezon

- Built a full-stack content management website (React, TypeScript, Node.js, Express, MongoDB) for a school organization to centralize announcements previously scattered across Facebook
- Implemented a rich-text content editor (TipTap) supporting image embedding, code blocks, and formatted publishing
- Developed secure authentication (JWT, bcrypt) and integrated Cloudinary for media storage and delivery
- Delivered the complete platform within a six-week timeline

Work Immersion Trainee, Mathematics S.Y. 2022–2023
Plaridel Integrated National High School — Nagcarlan, Laguna

- Assisted in teaching junior high school mathematics to students under the supervision of a licensed instructor
- Recognized as Work Immersion Awardee for performance and conduct during the placement

PROJECTS

GWA Predictive Model — CSST 104: Advanced Machine Learning Mini Capstone Academic Project

- Supervised the technical implementation and algorithmic accuracy of a machine learning model predicting academic performance (GWA) from social media usage patterns among Filipino college students
- Integrated the StayFree API to synthesize digital wellbeing and usage metrics, correlating screen-time habits with academic outcomes for performance prediction
- Built the frontend with React, TypeScript, Vite, TanStack Query, React Hook Form + Zod, Tailwind CSS, and Radix UI

Smart Egg Sorter — Computer Vision Fertility Detection App 2025 – Present

- Rebuilt the thesis project's companion app as an offline-first PWA for poultry farmers with unreliable connectivity, running species classification fully on-device
- Trained and compared CNN backbones (ResNet50, EfficientNetB0, MobileNetV2, AlexNet) across duck, chicken, and quail datasets; selected EfficientNetB0 (duck) and ResNet50 (quail, 85.7% accuracy) as best performers
- Integrated real ESP32 hardware over a local wireless access point for device pairing, onboarding, and live IR sensor-based egg detection — built with Next.js, TypeScript, Tailwind CSS, and Supabase

LEADERSHIP & ACTIVITIES

Semicolon (Programming Corp), Laguna State Polytechnic University San Pablo City
Member *September 2023 – February 2024*

- Trained under senior programming club members in software development fundamentals
- Built programs and coding projects as part of the club's peer-mentorship curriculum

15th EdukCircle International Convention on Engineering and Computer Technology December 2023
Attendee — University of the Philippines Diliman

- Participated in an international convention on engineering and computer technology developments

SKILLS & INTERESTS

Technical: React, Next.js, TypeScript, JavaScript, Node.js, Express, Tailwind CSS, MongoDB, PostgreSQL, Drizzle ORM, Supabase, OpenCV, Git, AWS

Laboratory: CNN model training and evaluation, image preprocessing (OpenCV), embedded systems prototyping (ESP32)

Languages: Filipino (native), English (conversational)

Interests: Roblox game development, guitar, console gaming, fitness/gym training
